

Fact Sheet

Q4 (October 2020 - December 2020)

Three Point Capital Corp. (ThreePoint) is a private Canadian non-bank mortgage lender providing mortgage financing in BC, AB, MB, and ON.

The introduction of the mortgage stress test in Canada, now coupled with tightened mortgage underwriting policies due to COVID-19, continues to significantly affect one's ability to qualify for traditional bank financing. ThreePoint firmly believes that this tightening in traditional lending policy has moved higher qualified borrowers towards non-traditional lenders such as ThreePoint. While this migration of higher credit quality borrowers represents an opportunity for ThreePoint, it also comes at a time where there is a degree of uncertainty surrounding future real estate values given the current COVID-19 crisis. Disciplined lending and conservative loan-to-values will help ensure ThreePoint continues to manage through this crisis.

ThreePoint delivered to its shareholders a net rate of return of 6.28% in 2020, slightly exceeding its adjusted target return of 6% for the year. A special top-up dividend was declared for all shareholders of record as at December 31st, 2020. The company continues to pay a dividend monthly and fully anticipates paying a top-up dividend to all shareholders of record on December 31st, 2021 to ensure dividends paid match the performance of the company. ThreePoint has delivered uninterrupted monthly dividends since inception.

94% of ThreePoint's portfolio is comprised of 1st position mortgages and 99% of ThreePoint's portfolio is secured against residential homes in marketable Canadian centers. The overall portfolio weighted average loan-to-value is only 55.8%.

* Net dividend yield for past years is the audited return net of all expenses and fees incurred by ThreePoint. The actual rate of return earned by each investor may depend on the timing of the investor's transactions and how they elect to receive the monthly dividend distribution. Past performance is not indicative of future performance. Please read the ThreePoint offering memorandum for important information, including a description of the risks, before investing.

Protection When Values Drop

Investing in real estate offers security, but owning it can be risky when markets soften. MIC investing offers downside protection relative to an equity investment when real estate values decline. We lend, on average, 55.8% of the value of a home, so a modest drop in housing values pose minimal risk of loss.

Policy & Risk

- Independent appraisal required on every mortgage prior to funding.
- Assertive enforcement procedures with borrowers when required.
- Thorough review at time of renewal.
- Independent Board of Directors that approves any mortgage exposure over \$1 Million.
- Underwriting Risk Policy & Procedure Manual.
- Maximum Loan-To-Value is 75% (current average LTV is 55.8%).

6.28% 2020 DIVIDEND

7.03% (2019), 7.17% (2018)
