Invest. Lend. Grow.

Three Point Capital Corp. is a Canadian non-bank mortgage lender providing mortgage financing in BC, AB, and ON.

Often referred to as providing secured bridge-financing, or short-term solution lenders, non-bank mortgage lenders in Canada have benefited from the introduction of the mortgage stress test, coupled with still elevated interest rates. Traditional lenders have made it more complicated to get mortgage financing and steep interest rates have made debt service qualifications much harder to meet. Three Point Capital firmly believes that this tightening in traditional lending policy has moved more qualified borrowers towards non-traditional lenders such as Three Point. While this migration of higher credit quality borrowers represents an opportunity for Three Point, it also comes at a time where there is a degree of uncertainty surrounding future real estate values across Canada. Disciplined lending and conservative loan-to-value ratios will help ensure Three Point continues to manage its portfolio with care.

Three Point delivered to its shareholders a net rate of return of 9.68% in 2024, exceeding its target return of 9% for the year. Given the company pays dividends monthly, currently set at an annual rate of 8.5%, a special 13th top-up dividend was declared for all shareholders of record as at December 31st, 2024. The company continues to pay a dividend monthly and fully anticipates paying a top-up dividend to all shareholders of record on December 31st, 2025 to ensure dividends paid match the actual performance of the company. Three Point has delivered uninterrupted monthly dividends since inception. The annualized rate of return for the company during the first 3 months of the year equates to 9.32%.

92% of Three Point's portfolio is comprised of 1st position mortgages and 100% of Three Point's portfolio is secured against residential homes in Canada. The overall portfolio weighted average loan-to-value is only 54.3%.

March 31, 2025

Portfolio	
Total Portfolio Size	\$195.6 million

Our Business

Protection When Values Drop

Investing in real estate offers security, but owning it can be risky when markets soften. MIC investing offers downside protection relative to an equity investment when real estate values decline. We lend, on average, 55% of the value of a home, so a modest drop in housing values pose minimal risk of loss.

Policy & Risk

- Independent appraisal required on every mortgage prior to funding.
- Assertive enforcement procedures with borrowers when required.
- Thorough review at time of renewal.
- Board of Directors approves any mortgage exposure over \$1.5M.
- Underwriting Risk Policy & Procedure Manual.
- Maximum Loan-To-Value is 75% (current average LTV is 54.3%).

Mortgage Diversity

Our Portfolio

Canada's limited number of financial institutions and their tightening of policies governing their own mortgage lending has created an opportunity to service a growing segment of the mortgage market while increasing the quality of security for our shareholders. A typical loan in our portfolio has an interest rate of 9% per annum, a loan-to-value ratio of 55% – 65%, a one year term and monthly amortized mortgage payments.

Portfolio Composition

As of March 31, 2025
